

# Implementation strategy of nursing documentation in a new complex healthcare recording system

Primary author: Anne Marie Boeskov  
Co-author: Pia Frøslev Wiegmanns

The electronic healthcare system is inconsumerable wether the patient is an out-patient or an in-patient

Knowing how to

Doing it

Audists showed a higher quality, and an increase in recording nursing documentation

There was a need to define, how and where nursing documentation should be written, so data could be shared, seen and used throughout the Department

A new description workflow was prepared and new guidelines were implemented

Audists before and after were conducted
